

PRODUCT DATASHEET

TeleCare DOOR

Security on your doorstep!

Explanation:

The door monitoring module from TeleCare provide triple security:

Firstly, it offer protection against intruders.

Secondly, it provides security for disoriented people by triggering an alarm as soon as the outer door is opened.

Thirdly, it can be used instead of a movement detector for automatic activity monitoring. This is necessary if you have pets.

The module can monitor the refrigerator or toilet doors, for example, and trigger an alarm if no activity is detected after a defined period of time.

Vantages:

- Reed contact on both sides
- easy to install
- up to 5 years battery life time
- Battery status supervision
- overrideable on/off switch
- programmable via NPU
- Reliable radio communication with acknowledgement
- 869.200-869.250 MHz frequency dedicated for social alarms
