TELECARE SYSTEMS

PRODUCT DATA SHEET

TeleCare emergency watch VITA

Waterproof with different localization possibilities!

Description:

The TeleCare emergency watch VITA offers a wide range of safety features, and with the help of various location technologies such as GPS, Wi-Fi, GSM, and Beacon (Bluetooth), help can be provided quickly in emergency situations.

An emergency call can be easily triggered using the emergency button located at the bottom of the display. In addition, a fall sensor automatically detects falls and reliably sends an emergency call in such cases. To avoid false alarms, the person is warned with an acoustic pre-alarm and a vibration alarm when triggering an emergency call.

The emergency watch is equipped with a roaming SIM card, ensuring that communication always takes place via the best available provider. Thanks to a microphone and speaker, it is possible to speak directly with the affected person in case of an alarm.

Another useful feature is the reminder alarms. This function helps to remind the user about important things, such as drinking breaks, exercising, or taking medications at the right time.

Charging the emergency watch is especially easy thanks to the included charging dock, and it takes maximum two hours. Additionally, the emergency watch can be customized as it is compatible with standard watch straps.

The emergency watch is also suitable for use with individuals suffering from dementia. With geofencing zones, family members or caregivers can be instantly notified when the person enters or exits a defined area. Optionally, a special dementia band can be added to provide additional protection.

Advantages:

- Pre-alarm when emergency call is triggered
- Function monitoring (test alarm)
- Waterproof IP67
- Low battery warning
- Programmable fall sensor
- Various location tracking options GPS, Wi-Fi, GSM, and Beacon
- Automatic activation when charging
- Easy-to-read display
- Very good standby time
- Various reminders
